CAPITOL EXPENDITURES.

What a Special Committee of the Legislature Says About Extravagance in the Use of Public Funds.

The Legislature having instructed the Committee on State Affairs in the two Houses to examine into alleged irregularities in the expenditure of the \$75,000 appropriated for repairing the east wing of the Capitol, that committee reported to the Legislature, from which the following extracts are taken: "Early during the last session of the Legis-lature a resolution was adopted, requesting the board of State House Commissioners to

Senate chamber, and an estimate of the cost thereof, and report the same to the chair-man of the Committee of Ways and Means to enable that committee to report an appro-priation to carry the same into effect. At this time the board was composed of J. B. Anderson, John Hammond and — Hood, and E. T. Carr was State architect. General Anderson, who had been a member of the board since the organization, in 1878, resigned in May, 1885, his place being filled by Mr. Carr, who resigned the position of architect, at \$125 per month, to accept that of commis-sioner at \$50 per month. Thomas Butler was appointed commissioner in March 1885, to succeed Mr. Hood, whose term had expired, and the board then and since, during the en-tire progress of the work has been, and now is composed of Mr. Carr, Mr. Hammond and Mr. Butler. Messrs. Haskell & Wood having prior to the resignation of Mr. Carr, performed the assistant supervisory and archi-tectural services, at a salary of \$250 per month, were, upon his resignation, appointed as a firm to the office of State architect; but finding some difficulties in drawing the necessary amount of salary, the firm resigned, and Mr. Haskell was appointed State archi-tect, at a salary of \$125 per month, by law, and his partner, Mr. Wood, was appointed to do the assistant architectural and supervisory services, at a salary of \$250 per month, fixed

ent during the time the work was actually in The committee recites the Senate resolution of 1885 asking for estimates, the action of the board of commissioners, the estimate of Mr. Carr, then the architect, and his estimate that the work would cost \$75,000, and the appropriation by the Legislature of the \$75,000 which was to complete the work. The com-

"From the facts already found, as well as from the history of the appropriation and the language of the act itself, we are impelled to the further conclusion that the present mem-bers of the board of State House Commissioners, as well as the architects, all well knew that t was the intention of the Legislature to limit the expenditure to be made upon the east wing to the \$75,000 named in the act. And we urther find that the board of State House commissioners, in violation of their duty, and in violation of what they knew to be the intention of the Legislature and the law, being ably aided and abetted therein by the architect, who is equally culpable, have already expended, including liabilities incurred but not paid, more than \$43,000 in excess of the amount appropriated, and that from \$15,-300 to \$25,000 more will be required to complete the work. The excuses made for this are that it was necessary to put in additional iron trusses to support the ceiling, at a cost of \$10,390, and new boilers for the heating apparatus, at a cost of \$2,181, which were t known to be necessary at the time the esti-mate was made; and that they, the architects as well as the board, supposed that the Senate wanted a better room than the House; and that if the Senate chamber was finished in the same style as the west wing, it would not be in keeping with the growth and progress of the State. We do not think the excuses sufficient. This increased expenditure caused by these items amounts to but \$12.500. General Anderson testifies that the sum of \$3,675 was put into the estimate for greewing the steam heating apparatus, which reduces the amount of expense not in the estimate to less than \$9,000 and the expenditure of \$400 of that sum was caused by not letting the iron truss contract to the lowest bidder; and as to the style and expense of the finish which should have been adopted, the board of Commissioners and the architects had no right to gainsay the wishes and commands of the Legislature. The board of State House Commissioners met once a month-and in one or two cases oftenerwent through a routine of business, allowed the bills that were recommended by the arch itects, and went home-rarely staying more than one day, and frequently less-for which they were paid by law \$50 per month-in reality about \$50 per day. Instead of giving the work such personal supervision as the best interest of the State required, and as the law makes it their duty to do, they gave it no personal supervision, allowed it to take care of itself, turned it over entirely to the architects; allowed them to run it without let or hindrance; on their recommendat on allowed illegal claims amounting to hundreds of dollars, and seemed in all things to forget, or neglect, the duties and responsibilities which the law devolved upon them as sworn offi-

cers of the State. The committee then refers to favoritism in the letting of the contract for the iron which. to say the least, appeared suspicious, and adds: "The board allowed work to be done and material to be furnished amounting to thousands of dollars, without any written contract, the person doing the same present-ing his pay rolls and bills, on which he was lowed by the board pay for his own services and for all expenses as reported by him, and in addition thereto, ten per cent, as a perquis \* \* \* \* As for the arch teets, in the matters of exceeding the appropriation, letting of contracts to other than the lowest hidder, payment of illegal claims, we find them to be oally blame-worthy with the board, as in all these matters they advised the action that was taken, and were able advocates of the adoptions of the plans that they would require an expenditure far beyond the and artistic in design, in material and in workmanship, and in other respects the plan

is bad, the material faulty, and the workmanship poor. Here follows a criticism on the character of the work and designs in the Senate cham-ber, and defects, which should never have oeen permitted, but having been done under the eyes of the architects, the most that can be expected will be an "attempt to patch, or cover up the most glaring defects, leaving the others to be criticised and condemned for all time." The committee protests "against the system that has been pursued in this State of appropriating money to be expended in building, before full plans, specifications, and estimates are prepared and approved.

The report concludes We recommend that the present board of State House Commissioners, the State archi-tect and assistant architect to be at once removed from office. That when a new board s appointed, it shall in addition to its duties as now prescribed by law, cause to be prepared full plans and specifications for the construction and completion of the central building of the State House, with careful esti-mates of the cost thereof, and have the same ready to submit to the next session of the

Legislature. The report is signed by W. W. Smith, L. C. Wasson, L. D. Young, E. J. Donnell and C. Kimball, on the part of the Senate, and C. H Lewis, H. A. Miller, W. A. Lower, George M Kreger, Thomas J. Matlock, J. Ware Butter field, W. H. McBride and J. R. Spiers, on the part of the House.

He Was a Prophet. WASHINGTON, Feb. 20 .- Prof. Devoe, of Hackensack, who came to Washington to wrestle with the weather problem, has been thrown in the first round. The professor on weather imaginable to prevail until the 17th, when the climax would be reached in a heavy fall of snow. The minute the professor announced gloomy weather the skies cleared, and the sun and moon took turns able. The professor will probably retire to his rural retreat to evolve another infallible system of weather prophecy.

COLORED HIGH LIFE.

A Sketch of the Social Life of That Race Resident in Washington. There is an aristocracy among the colored people of Washington as well 600,000 members of the Presbyterian as among the white, and it is quite exclusive. The caste is very strictly marked, and it is as difficult for a For all derangements of the liver, bowels camel to go through the eye of a needle as for a member of the class donated as

"trash" to gain admission to the circle of the "quality" negroes. The focus or pole around which the high-toned colored sociely revolves is the Fifteenth an aristocratic section of the city-Mc-Pherson Square.

The leading men in this church are Ex-Senator Bruce, Dr. Purvis, John Langston, late Minister to Hayti, who has recently been elected president of Greener, who is in charge of the Grant your hand in.—Burlington Free Press. monument fund; the Wormleys, who are proprietors of the most aristocratic hotel here; George Cook, the superintendent of colored schools; John F. Cook, the collector of taxes of the District, and others of the creme de la creme. The pastor of this church is Rev. Mr. Grinke, a young man of about thirty-five years, who was graduated at Lincoln University with the valedictory of his class, and studied theology at study at Athens. The Greek Govern-Princeton. Fred Douglass does not worship here, but lives in a suburban village called Uniontown and belongs -The importance of systematic giv- to the Baptist denomination. Since he married a white woman he has not Dr. Parkhurst yesterday. "A single been received as cordially as before, dollar," he said, "may look large, but in the aristocratic circles of his race, when spread out over a year it is who thought he might have found a too thin to lie down upon and pray Thy spouse of his own color in better taste. Congressman O'Hara, of North Carolina, is a member of the coterie, but, singularly enough, he and his wife are Catholics and attend St. Augustine's Church.

Mrs. O'Hara is one of the loveliest ladies in Washington and were in not for the slight trace of negro blood in her veins she would be the leader in white society. Like Mrs. Bruce, who is also beautiful, she is a highly educated and accomplished woman, speaks French, plays Beethoven, paints plaques and is up in art and literature to a degree that would make some of her white sisters blush for envy. Both Mrs. Bruce and O'Hara are very nearly white and it would be difficult for a stranger to detect their relation to the African race. Mrs. O'Hara has a white governess for her children and intends that they shall be as accomplished as herself.

These people have their own society. give balls, dinner parties receptions and other entertainments and pay formal visits on regular reception days, just like the ladies of official life.

At a "high tea" or a ball given by this circle of the colored aristocracy | "I have been taking Hood's Sarsaparilla for about one can find quite as much intelligence, quite as much beauty and quite as much grace of manner as will be of white folks. Both gentlemen and the costumes of the ladies are duly des- bottle of Hood's Sarsaparilla I am getting well rapidcribed in the Sunday Bee, the organ of | 15." ## Poisoned by Scrofula

The taint of scrofuls in the blood should be got rid of or serious consequences may result. Consumption is undoubtedly scrofula of the lungs, and in its early stages may be cured by purifying the blood and building up the system. For this Hood's Sarsaparilla is unequaled. It also cures scrofula when it appears in the form of running sores, bolls, bunches in the neck, catarrh, or in any other manner. While it purifies, Hood's Sarsaparilla also vitalizes and enriches the

A QUESTION ABOUT Brown's Iron Bitters ANSWERED.

The question has probably been asked thousands of times. "How can Brown's Iron Bitters cure everything?" Well, it doesn't. But it does cure any disease for which a reputable physician would prescribe 1868 Physicians recognize Iron as the best restorative agent known to the profession, and inquiry of any leading chemical firm will substantinte the assertion that there are more preparations of iron than of any other substance used in medicine. This shows conclusively that iron is acknowledged to be the most important factor in successful medical practice. It is, however, a remarkable fact, that prior to the discovery of BROWN'S IRON BITTERS no perfectly satisfactory iron combination had ever been found. BROWN'S IRON BITTERS the touth, cause hesdache, or produce constitution—all other from medicines do. BROWN'S IRON BITTERS cures Indigestion, Billousness, Weakness, Dyspepsia, Malaria, Chills and Fevers, Tired Feeling, General Debility, Pain in the Side, Back or Limbs, Hendache and Neural-gia-for all these ailments Iron is prescribed daily. BROWN'S IRON BITTERS, however, does minute. Like all other thorough medicines, it acts slowly. When taken by see the first symptom of benefit is renewed energy. The muscles then become firmer, the direction improves, the bosels are active. In somes the effect is usually more rapid and marked. The eyes begin at once to brighten; the skin clears up; healthy color comes to the cheeks; nervousness disappears; functional derangements become regular, and if a nursing mother, abundant sustenance is supplied for the child. Remember Brown's Iron Bitters in the ONLY iron medicine that is not injurious. Physicians and Druggists recommend it,
